

■ Educational Course

Educational Courses to Learn and Practice Japanese Culture and History.

Educational courses aimed to practice manners by learning Japanese culture and history and acquiring development of “mind” and “form”.

■ About our Original Courses

Other curriculums can be arranged upon request.

A wide range of courses are offered – such as a culture course for daily life, a children’s course for the next generation of etiquette, and a course for achieving a brighter and more ‘elegant’ way of life.

Our courses are instructed by the professional masters.
An evidence of course completion will be issued after the course.
